

GAS COMPRESSION SOLUTIONS

EPS Compression provides the most reliable and cost effective compression systems for coal seam and conventional gas production and delivery.

EPS Compression, through its parent entity, Energy Process Services Pty Ltd, is the authorised distributor of Cameron Compression Systems' AJAX integral engine-compressors and SUPERIOR compressors.

EPS Compression is capable of handling all reciprocating compressor applications up to 9,000 hp. All packages supplied fully comply with Australian Standards.

EPS Compression, together with Cameron, look forward to servicing your requirements for new compressor sales, rental packages and after sales support. We also provide field operations and maintenance, including technical training for owner operators.

A highly-acclaimed product lineup with legendary performance and reliability from the AJAX and SUPERIOR brands.

MOVE MORE GAS PER HORSEPOWER!

AJAX integral engine-compressors are the premier product for gas gathering and production worldwide. Each model is capable of delivering 99+% availability with minimal maintenance. Relying upon a unique, compact integral design, the conservative operating speed and large compressor cylinder valve areas permit AJAX integrals to move more gas per horsepower than any competitive product. AJAX models range from the DCP-2801 at 192 bhp to the DCP-3404 at 970 bhp.

Power Absorbed per mmscfd**

■ Ajax DPC 3404 ■ Cat 3512-Ariel RG357M

In addition, AJAX operating and maintenance costs are significantly lower than high speed separable and screw compressor units. Review the AJAX OPEX saving comparisons at www.epsccompression.com.au

SUPERIOR PRODUCTS, SUPERIOR SERVICE, SUPERIOR TECHNOLOGY

There is a SUPERIOR compressor built to work long and hard in any gas application, whether it's the couple-free **C-Force**, the **RAM** with convertible cylinders, or the high rod load **MH**, **WH** and **WG** frames, the largest high-speed frames in the industry. The entire line of SUPERIOR compressors are famous for their inspired design principle of full-line flexibility, with superior operating value as their cornerstone. In fact, SUPERIOR models are currently meeting performance guarantees in excess of 99% for both availability and reliability. The SUPERIOR product line-up range from 580 hp to 9,000 hp.
